Thank you!

This body of work would not have been possible without the guidance, motivation and support of many people. First and foremost, I would like to thank **Pieter Roelfsema**. Pieter, thank you for giving me the opportunity to work with you on so many interesting projects. Your dedication to your work has been inspirational. I believe I have become a better researcher thanks to you. Thank you for your guidance, support and for teaching me how to ‘science’.

I would like to thank the Marie Curie ITN program and other funding agencies for their support.

I would also like to thank the thesis committee for taking the time to read this dissertation.

Chris (vdt): It has been a real pleasure to have worked with you for all this time. I learnt a lot from you about electrochemistry, programming, analysis, and Dutch culture. Thank you for introducing me to Karnemelk (*lekker*). I loved the myriad of scientific, political and cultural discussions we had! I am glad that you survived your trip to India and learnt to look down before walking in dark alleys :P

Ulf: Thank you for being an awesome friend and office-mate; for having the same sense of humour and for being my bunkmate during all the ONWAR retreats. I am glad you were able to come to India and attend my wedding. I will always fondly remember that you assimilated quickly and handled local spicy Indian food quite well, but the Indian McDonalds was too hot for you! ;-)

Roxanna: My dear friend I will really miss you and all the fun discussions (scientific and otherwise) we had. For always keeping me in the loop with the “news” and happenings around the NIN. Thank you for sharing an office with me.

Jessy: Thank you for being a great, kind, and helpful friend. Thank you for the Dutch-to-English translations over the years and for the fun tour around Hoorn. I am glad to have shared an office with you.

Matt: Thank you for being an awesome sounding board for ideas related to analysis and statistics. Apologies for losing your Frisbee on the roof :-P

Areg: Thank you, for all your optimism and enthusiasm you applied to everything you did, for all the fun discussions we had, Fussball and co-founding the whisky-tasting club.

Bram: Thank you for ‘showing me the ropes’ when I first joined and for all the collaborative hours we spent on the experiments. Apologies for all the scary moments you had when entering your setup! ;-)

Danique: Thank you for trying to teach me Dutch one word at a time (even though I was not a very good student) and for all the tips in recruiting participants for my experiments.

Kor: Thank you, for teaching and helping me to take care of our “cousins”, and for all your help with the surgeries, scrapings and keeping my setup clean:-D. Thank you for all the strawberries!

Marie-Alice, Chris K, Bruno, Pia, Jeannette, Anne, Enny, Catherine, Sreedeeep, Xing, Jonathan, Rob, and other members, thank you for making the Roelfsema Lab a fun, engaging, and productive workplace.

Thank you **Premnath, Rajeev, Hadi, Mehran, Sreedeeep,** and **others** for the Fussball fun, after a long day of experiments.

Ruud Joosten: Thank you for helping me with instrumentation and tools. I always admired that you never said “No” to all my requests (so many of them!).

Thank you, **Bart Fisser, Tini Eikelboom, Wilma Verweij, Ernita Pfaff** and **Heidi Lieveid,** whose help kept me away from Dutch bureaucracy.

Lastly, I am grateful for having such a wonderful family; my loving (and patient) wife (**Shachi**) and my mom (**Anuradha**), dad (**Dhananjay**), brother (**Nachiket**) and sister-in-law (**Amruta**), all of whom have been pillars of support throughout my PhD, thank you for everything.

Finally, I would like to thank all humans and non-humans for taking part in my experiments.
