Patient safety and complex care for older hip fracture patients

A study of the assessment, appraisal, judgement and management of risks

Hanneke Merten
Patient safety and complex care for older hip fracture patients: A study of the assessment, appraisal, judgement and management of risks

The studies presented within this thesis were conducted at NIVEL (Netherlands institute for health services research) and the Department of Public and Occupational Health of the VU University Medical Center Amsterdam/Amsterdam Public Health research institute (previously EMGO+). The presented work was supported by grants from ZonMw (The Netherlands Organisation for Health Research and Development) and the Dutch Ministry of Health, Welfare and Sport.
