Contents

1	Introduction	7
1.1	Intermezzo: delay equations	9
1.2	Interval arithmetic	10
1.3	Example: real eigenvalue of DDEs using interval arithmetic	12
1.4	Contractions & the radii-polynomial method	13
1.5	Example: the radii polynomials method for the unstable manifold of a DDE	17
1.5.1	The Y bound.	20
1.5.2	The Z bound.	20
1.5.3	The radii polynomial	25
1.6	About this thesis	26
2	Rigorous computation of a radially symmetric localised solution in a Ginzburg-Landau problem	35
2.1	Introduction	35
2.2	Construction of the integral equation	40
2.3	Finite dimensional approximation	41
2.4	Radii polynomials	43
2.5	The linearised equation	44
2.6	Interval arithmetic evaluation of logarithmic integrals	46
2.7	Explicit construction of the Y -bounds	51
2.8	Explicit construction of the Z -bounds	52
2.9	Computational aspects of the proof of Theorem 2.1.1	56
2.A	Exponential dichotomy	58
3	Periodic solutions of non-polynomial delay equations by auto- matic differentiation	61
3.1	Introduction	61
3.1.1	Outline of the method	63
3.2	Polynomialization of DDEs: periodic solutions via Fourier-series .	65
3.2.1	Polynomialization of nonlinearities	65
3.2.2	Systems of equations and Fourier series.	69
3.2.3	Sequence spaces for analytic functions	72
3.3	Functional analytic necessities	76

3.3.1	General radii polynomial approach	76
3.3.2	The truncated function	79
3.3.3	The approximate inverse	81
3.3.4	Real solutions and symmetric sequence spaces	83
3.3.5	Pseudo-convolutions	85
3.3.6	Estimates of operators	87
3.4	Derivation of the Y and Z bounds for the Mackey-Glass equation .	90
3.4.1	The Mackey-Glass system	91
3.4.2	The Y bounds	92
3.4.3	The Z bounds.	92
3.5	Numerics and results	101
3.5.1	Control parameters	101
3.5.2	Results	103
3.5.3	Discussion	105
4	Parameterization method for unstable manifolds	
	of delay differential equations	107
4.1	Introduction	107
4.1.1	Sketch of the method	108
4.1.2	Related work	113
4.2	Parameterization of invariant manifolds for functional differential	
	equations	115
4.2.1	Unstable manifold of an equilibrium	115
4.2.2	Unstable manifold of a periodic orbit	123
4.2.3	Unstable manifold of an equilibrium for state dependent delays	129
4.3	Numerical applications	132
4.3.1	Computation of eigenvalues and eigenvectors	132
4.3.2	Decay rates and scaling	133
4.3.3	Benchmarks	133
4.3.4	Unstable manifolds of the cubic Ikeda equation	134
4.3.5	Unstable manifolds of Wright's equation	137
4.3.6	Unstable manifold of a state dependent delay equation . . .	141
4.4	Conclusions	143
4.A	Dynamical systems approach to DDEs	145
4.A.1	Functional differential equations: delay equations as ODEs	
	on a Banach space	146
4.B	The parameterization method	155
4.B.1	Unstable manifold attached to an equilibrium solution . . .	155
4.B.2	Unstable manifold attached to a periodic solution	159
