# Contents

<b>1</b>	<b>Introduction</b>	<b>11</b>
<b>I</b>	<b>Historical Mercury science, up to the MESSENGER mission</b>	<b>13</b>
<b>2</b>	<b>Mercury's orbit</b>	<b>15</b>
2.1	Mercury's Keplerian orbit . . . . .	15
2.2	Mercury's Newtonian orbit . . . . .	18
2.3	Mercury's relativistic orbit . . . . .	22
2.4	Measurements of the Astronomical Unit . . . . .	23
2.5	Appendix 2A . . . . .	24
2.6	Appendix 2B . . . . .	25
<b>3</b>	<b>Mercury's size, mass and gravity field</b>	<b>29</b>
3.1	Mercury's size . . . . .	29
3.2	Mercury's mass and density . . . . .	30
3.3	Mercury's gravity field . . . . .	33
<b>4</b>	<b>Mercury's rotation</b>	<b>37</b>
4.1	Detection of Mercury's rotation . . . . .	37
4.2	Mercury's rotational stability . . . . .	39
4.3	Physical librations of Mercury . . . . .	42
4.4	Mercury's rotational evolution . . . . .	44
4.5	Mercury's Cassini state . . . . .	45
<b>5</b>	<b>Mercury's formation</b>	<b>49</b>
5.1	Formation of the solar system . . . . .	49
5.2	The composition of the solar nebula . . . . .	50
5.3	Condensation, accretion and Mercury . . . . .	51
5.4	Theories for Mercury's formation . . . . .	54
5.5	The composition of Mercury's silicates . . . . .	55

<b>6</b>	<b>Mercury's age, evolution and interior structure, pre-Mariner 10</b>	<b>57</b>
6.1	The age of our solar system . . . . .	57
6.2	Mercury's interior configuration and thermal evolution . . . . .	58
<b>7</b>	<b>Mercury's surface and environment, pre-Mariner 10</b>	<b>61</b>
7.1	Optical properties . . . . .	61
7.2	Topography . . . . .	62
7.3	Atmosphere . . . . .	62
7.4	Surface temperature . . . . .	63
7.5	Subsurface . . . . .	65
7.6	Magnetic field . . . . .	66
<b>8</b>	<b>Mercury's surface and environment, post-Mariner 10</b>	<b>69</b>
8.1	Planning the Mariner 10 mission . . . . .	69
8.2	Surface: Topography and geological evolution . . . . .	70
8.3	Surface: Optical characteristics . . . . .	73
8.4	Surface: Temperature and subsurface . . . . .	74
8.5	Atmosphere . . . . .	75
8.6	Magnetic field: measurements and geometry . . . . .	77
8.7	Magnetic field: origin . . . . .	78
<b>9</b>	<b>Mercury's age, evolution and interior structure, after Mariner 10</b>	<b>81</b>
9.1	Mercury's evolution . . . . .	81
9.2	Mercury's interior configuration . . . . .	82
<b>II</b>	<b>Recent Mercury science, since the MESSENGER mission</b>	<b>85</b>
<b>10</b>	<b>Preparing the MESSENGER mission</b>	<b>87</b>
10.1	Planning the MESSENGER mission . . . . .	87
10.2	MESSENGER objectives . . . . .	88
<b>11</b>	<b>On Mercury's past rotation, in light of its large craters</b>	<b>91</b>
11.1	introduction . . . . .	93
11.2	The Distributions of Large Craters, Impact Fluxes, and $D > 100$ km Cratering . . . . .	94
11.2.1	The Spatial Distribution of Large Craters . . . . .	94
11.2.2	The Geometry of Spin-Orbit Resonances . . . . .	96
11.2.3	In-Orbit Variations in the Global Impact Flux . . . . .	97
11.2.4	The Population of Mercury Crossing Objects . . . . .	102
11.2.5	Impact Dynamics on Mercury . . . . .	102
11.2.6	Crater Scaling . . . . .	107
11.2.7	Cratering Simulations . . . . .	109

11.2.8	Statistical Tests . . . . .	111
11.3	Mercury's Rotational Dynamics . . . . .	114
11.3.1	Efroimsky's Torque . . . . .	114
11.3.2	Capture Probabilities near Spin-Orbit Resonances . . . . .	116
11.3.3	Spin-Orbit Resonance Transitions due to Large Impacts . . . . .	118
11.4	Discussion . . . . .	121
11.4.1	Uncertainties in Observations and Simulations . . . . .	121
11.4.2	Comparison with Observations . . . . .	123
11.4.3	Capture Probabilities and Spin-Orbit Resonance Transitions . . . . .	124
11.4.4	General Discussion . . . . .	124
11.5	Summary . . . . .	126
<b>12</b>	<b>The interior configuration of planet Mercury, constrained by moment of inertia and planetary contraction</b>	<b>127</b>
12.1	Introduction . . . . .	129
12.2	Method . . . . .	132
12.2.1	The interior configuration models . . . . .	132
12.2.2	EOS parameters . . . . .	134
12.2.3	Generation of density profiles . . . . .	137
12.2.4	Planetary contraction . . . . .	139
12.3	Results . . . . .	142
12.4	Discussion . . . . .	146
12.4.1	Error propagation . . . . .	146
12.4.2	Comparison with previous studies . . . . .	148
12.4.3	The evolution of a solid FeS layer . . . . .	149
12.5	Summary and conclusion . . . . .	151
<b>13</b>	<b>The thermal evolution of Mercury's Fe-Si core</b>	<b>153</b>
13.1	Introduction . . . . .	155
13.2	Methods . . . . .	156
13.2.1	The thermal evolution model . . . . .	156
13.2.2	The evolution of mantle and crust . . . . .	158
13.2.3	The core evolution . . . . .	159
13.2.4	Magnetic field scaling . . . . .	161
13.2.5	Parameters . . . . .	162
13.3	Results . . . . .	163
13.3.1	A representative scenario . . . . .	163
13.3.2	Sensitivity analysis . . . . .	167
13.4	Discussion . . . . .	171
13.4.1	Core evolution and magnetic field . . . . .	171
13.4.2	Mantle and crust . . . . .	172
13.4.3	The composition of Mercury and its core . . . . .	173
13.4.4	Implications for planetary thermal evolution models . . . . .	173
13.5	Conclusions . . . . .	174

13.6	Appendix 13A, the melting model . . . . .	175
13.7	Appendix 13B, Radiogenic heating . . . . .	176
13.8	Appendix 13C, Mantle configuration . . . . .	177
13.9	Appendix 13D, Magnetic field scaling . . . . .	178
<b>14</b>	<b>Dynamo simulations for generating Mercury's magnetic field</b>	<b>181</b>
14.1	Introduction . . . . .	183
14.2	Dynamo simulation . . . . .	185
14.3	Results . . . . .	188
14.4	Discussion . . . . .	190
14.5	Summary and outlook . . . . .	192
14.6	Appendix 14A . . . . .	192
<b>15</b>	<b>Calibration of the first multi-anvil high-pressure apparatus in the Benelux, named Nina</b>	<b>195</b>
15.1	Introduction . . . . .	197
15.2	Materials and methods . . . . .	198
15.2.1	Experimental setup . . . . .	198
15.2.2	Starting materials and phase transitions . . . . .	201
15.2.3	Experimental procedure and sample analysis . . . . .	202
15.3	Results . . . . .	202
15.3.1	Sample analysis . . . . .	202
15.3.2	Calibration curve . . . . .	203
15.4	Discussion . . . . .	204
15.4.1	Uncertainties . . . . .	204
15.4.2	General discussion . . . . .	206
15.5	Summary . . . . .	207
<b>16</b>	<b>Magma ocean crystallisation models of Mercury, a critical assessment</b>	<b>209</b>
16.1	Introduction . . . . .	211
16.2	Methods and materials . . . . .	212
16.2.1	Magma ocean crystallisation model . . . . .	212
16.2.2	Experimental method . . . . .	213
16.3	Results . . . . .	216
16.3.1	Experimental results . . . . .	216
16.3.2	Deep ocean solidification . . . . .	218
16.4	Discussion . . . . .	219
16.4.1	Distinguishing between initial mantle compositions . . . . .	219
16.5	Summary . . . . .	221
<b>17</b>	<b>Other discoveries by the MESSENGER mission</b>	<b>227</b>
17.1	Surface observations and geology . . . . .	227
17.1.1	Photography . . . . .	228
17.1.2	Topography . . . . .	229

17.1.3 Composition . . . . .	231
17.2 Gravity field . . . . .	232
17.3 Mercury's atmosphere . . . . .	233
<b>III Future Mercury science</b>	<b>235</b>
<b>18 BepiColombo</b>	<b>237</b>
18.1 History and mission concept . . . . .	237
18.2 Mercury's orbit, rotation, and interior configuration . . . . .	238
18.3 Surface . . . . .	239
18.4 Atmosphere . . . . .	240
18.5 Magnetic field . . . . .	240
<b>19 Revealing the composition of Mercury's core by seismic measurements</b>	<b>241</b>
19.1 Introduction . . . . .	243
19.2 Methods . . . . .	244
19.2.1 Experimental setup and procedure . . . . .	244
19.2.2 Calibration . . . . .	246
19.3 results . . . . .	248
19.4 Implications for a seismic mission to Mercury . . . . .	251
19.5 Summary . . . . .	251
19.6 Appendix 19A . . . . .	252
<b>20 Synthesis</b>	<b>255</b>
<b>21 Supplementary information</b>	<b>259</b>
21.1 Mariner 10 satellite instrumentation . . . . .	259
21.2 Messenger satellite instrumentation . . . . .	262
21.3 BepiColombo satellite instrumentation . . . . .	265
21.3.1 The Mercury Planetary Orbiter (MPO) . . . . .	266
21.3.2 The Mercury Magnetosphere Orbiter (MMO) . . . . .	270
