Contents

Chapter 1: General Introduction	1
1.1 Mind wandering.....	1
1.2 Meditation	3
1.3 Problem statement of this thesis.....	7
1.4 Introduction to Self-Organized Criticality and complexity.....	7
1.5 Thesis outline & aim: What are the applications for our daily life functioning?	15
Chapter 2 Negative mood and mind wandering increase long-range temporal correlations in attention fluctuations	18
Abstract.....	19
Introduction	20
Methods.....	22
Results.....	27
Discussion.....	33
References	36
Chapter 3: Strong long-range temporal correlations of beta/gamma oscillations are associated with poor sustained visual attention performance.....	47
Abstract.....	48
Introduction	49
Methods.....	51
Results.....	55
Discussion.....	59
References	65
Chapter 4: Long-range temporal correlations in alpha oscillations stabilize perception of ambiguous visual stimuli.....	76
Abstract.....	77
Introduction	78
Methods.....	81
Results.....	85
Discussion.....	92
References	97

Chapter 5: Controlling the Temporal Structure of Brain Oscillations by Focused Attention Meditation.	109
Abstract.....	110
Introduction	111
Methods.....	113
Results.....	119
Discussion.....	129
References	137
Chapter 6: Aberrant long-range temporal correlations in depression are attenuated after psychological treatment	143
Abstract.....	144
Introduction	145
Methods.....	146
Results.....	152
Discussion.....	158
References	162
Chapter 7: Discussion.....	166
7.1 General discussion	169
7.2 Open questions/ outlook	171
7.3 Conclusion implications	171
References.....	172
Summary	184
Samenvatting (Dutch Summary)	185
Publications	187
Publications not included in thesis	188
Contribution of the PhD candidate to the chapters in the thesis.....	189
Curriculum Vitae.....	191
Acknowledgements	192
