Contents

1	General Introduction	1
1.1	Hand anatomy	1
1.2	Causes of finger enslaving	2
1.3	Effects of Aging	5
1.4	Modeling	5
1.5	Overall aim and Thesis outline	6
2	Anatomical parameters for musculoskeletal modeling of the hand and wrist	7
2.1	Introduction	9
2.2	Methods and results	10
2.2.1	Model description	10
2.2.2	Anatomical data collection	11
	Inertial parameters	12
	Geometry: joint axes and surfaces	13
	Geometry: bony landmarks, muscle origins, insertions, via points and geometrical shapes	14
	Muscle morphological parameters	15
	Special cases	17
2.3	Discussion	17
2.4	Conclusion	20
2.5	Appendix	21
3	A musculoskeletal model of the hand and wrist: model definition and evaluation	37
3.1	Introduction	39
3.2	Methods	40
3.2.1	Joints	40
3.2.2	Muscles	40
3.2.3	Modification and scaling	41
3.2.4	Comparison with experimental data	42
	Moment arms during finger and wrist flexion/extension	42
	Calculation of Pinch force	42

3.2.5	Analysis	43
3.3	Results	43
3.3.1	Muscle active force production	43
3.3.2	Moment arm validation	43
3.3.3	Computed muscle moment arms for all fingers and joints	45
3.3.4	Force validation	46
3.4	Discussion	46
3.5	Acknowledgements	50
4	Timing and extent of finger force enslaving during a dynamic force task cannot be explained by EMG activity pattern	51
4.1	Introduction	53
4.2	Methods	54
4.2.1	Subjects	54
4.2.2	Experimental setup	55
4.2.3	EMG	56
4.2.4	Experimental protocol	56
4.2.5	Data analysis and statistics	57
4.3	Results	59
4.3.1	Index Velocity and MCP angle of the index finger	59
4.3.2	Time delays and corresponding index MCP angles	59
4.3.3	EMG activities and finger forces	60
4.3.4	Additional force enslaving	60
4.4	Discussion	62
4.5	Acknowledgements	65
5	Increased enslaving in elderly is associated with changes in neural control of the extrinsic finger muscles	67
5.1	Introduction	69
5.2	Methods	70
5.2.1	Experimental setup	71
5.2.2	EMG and force measurements	72
5.2.3	Experimental protocol	73
5.2.4	Maximum voluntary contraction and ramp force production	74
5.2.5	Data analysis and statistics	74
5.3	Results	75
5.3.1	Movement velocity of the index finger tip	75
5.3.2	Delay times	76
5.3.3	EMG and Force	76

5.3.4	Additional force enslaving	78
5.4	Discussion	79
6	General Discussion	83
6.1	Finger enslaving and relevance of wrist inclusion	84
6.2	Implications	85
6.3	Modeling	86
6.3.1	Model development, its relevance to enslaving and technical limitations . .	86
6.3.2	Mechanical inter-connections	87
6.3.3	Forward dynamics	87
6.4	Conclusions	88
	Summary	91
	Bibliography	101
	Acknowledgements	103
