Contents

Summary	1
Resum	5
Resumen.....	9
Samenvatting.....	13
Introduction.....	17
1. Endocrine disruptors/Environmental chemicals and human health	17
2. From classical dose response to Integrative Systems Toxicology	17
3. Components of Integrative Systems Toxicology and their modelling approach.....	20
3.1. PBPK (Physiologically Based Pharmacokinetics) Models	20
3.2. Pharmacodynamics Model/Dynamic System Analysis	26
3.3. QIVIVE.....	29
3.4. AOPs.....	30
3.5. Systems Biology (SBs)	31
4. Integrative Systems Toxicology.....	31
Hypothesis and Objectives.....	33
Hypotheses.....	35
General Objective	36
Chapter 1.....	37
Review on Crosstalk and common mechanisms of endocrine disruptors: scaffolding to improve PBPK / PD models of EDC mixtures	39
1. Introduction.....	41
2. Molecular mechanism of EDCs actions on the endocrine system	43
3. Effects of EDCs in different windows of exposure: case study on female fertility effects	48
4. Grouping strategy and conceptual model of PBPK/PD in assessing risk for chemical mixture.....	52
5. Summary & future perspectives.....	55
References.....	57
Chapter 2.....	79
Development and validation of Adult PBPK models	79

2A. Development of a human physiologically based pharmacokinetic (PBPK) model for phthalates and its metabolites: A bottom up modeling approach	81
1. Introduction.....	82
2. Models and Methods.....	84
2.1. Overview of the modeling approach.....	84
3. Results and Discussions.....	94
3.1. Sensitivity analysis results	94
3.2. PBPK model calibration results and its evaluation with independent data.....	96
4. Conclusions and future work	103
References.....	104
2B. Development and evaluation of a harmonized whole body physiologically based pharmacokinetic (PBPK) model for flutamide in rats and its extrapolation to humans.....	125
1. Introduction.....	126
2. Material and Methods	127
2.1. PBPK model development.....	127
3. Results.....	135
3.1. Rat PBPK Model.....	135
3.2. Human PBPK model.....	137
3.3. Parameter Sensitivity	140
4. Discussion.....	144
References.....	146
Chapter 3.....	167
The development of a pregnancy PBPK Model for Bisphenol A and its evaluation with the available biomonitoring data.....	169
1. Introduction.....	170
2. Methodology and parameterization	173
2.1. General pregnancy-PBPK Model structure.....	173
2.2. Gestational growth physiology model	173
2.3. BPA pharmacokinetics.....	177
2.4. Fetoplacental BPA kinetics.....	181
2.5. Amniotic fluid BPA kinetics.....	182

2.6. Partition coefficient for pregnant mother and fetus organs	182
2.7. Pregnancy cohort studies	183
3. Results	183
3.1. Simulation and validation of adult human PBPK model	183
3.2. Simulation and evaluation of P-PBPK Model	184
4. Discussions	189
5. Conclusion	192
References	193
Chapter 4	203
Dynamic networks of oxidative stress: From disease maps to design principles suggesting personalised therapies for Parkinson’s disease	205
1. Introduction	206
2. Methods	208
3. Results	208
4. Discussion	219
References	232
Chapter 5	239
Integrative Systems Toxicology models	239
5A. Developing an Integrated PBPK/PD Coupled mechanistic pathway model (miRNA-BDNF): an approach towards Systems Toxicology	241
1. Introduction	242
2. Materials and Methods	244
3. Results	252
4. Discussion and Conclusions	257
References	259
5B. All- in-One-Model for understanding ROS induced hepatotoxicity: From organ-specific pharmacokinetics of Flutamide to predicting its toxic-dynamics effects	281
1. Introduction	282
2. Material and Methods	284
3. Results	286
4. Discussion	302
References	303

General discussion	309
Conclusions.....	315
References.....	318
Chapter 1: Supplementary information	339
Chapter 2: Supplementary information	347
Chapter 3: Supplementary information	361
Chapter 4: Supplementary information	373
Chapter 5A: Supplementary information.....	377
