

# **Sample-preparation techniques for gas chromatography**

**innovation, automation and comprehensive couplings**

Jacobus Albertus de Koning

VRIJE UNIVERSITEIT

**Sample-preparation techniques for gas  
chromatography**

**innovation, automation and comprehensive couplings**

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad Doctor aan  
de Vrije Universiteit Amsterdam,  
op gezag van de rector magnificus  
prof.dr. L.M. Bouter,  
in het openbaar te verdedigen  
ten overstaan van de promotiecommissie  
van de faculteit der Exacte Wetenschappen  
op donderdag 16 oktober 2008 om 15.45 uur  
in de aula van de universiteit,  
De Boelelaan 1105

door

**Jacobus Albertus de Koning**

geboren te Ridderkerk

promotor: prof.dr.ir. J.G.M. Janssen  
copromotor: prof.dr. U.A.Th. Brinkman

*Aan mijn ouders*

# Contents

<b>I Introduction</b>	9
1 Introduction	11
2 Modern methods of sample preparation for gas chromatographic analysis	17
<b>II Improved and/or automated sample preparation</b>	105
3 A PTV interface for on-line trace-level enrichment–GC–MS of micropollutants in surface water	107
4 Automated determination of fatty acid methyl ester and <i>cis /trans</i> methyl ester composition of fats and oils	117
5 Automated liner exchange – a novel approach in direct thermal desorption–gas chromatography	127
6 Trace-level determination of pesticides in food using difficult matrix introduction–gas chromatography–time-of-flight mass spectrometry	143
7 AT-column, a novel concentrating technique for large-volume injections in gas chromatography	153
<b>III Comprehensive techniques</b>	171
8 Automated on-line comprehensive two-dimensional LC×GC and LC×GC–ToF MS: instrument design and application to edible oil and fat analysis	173
9 Group-type characterization of mineral oil samples by two-dimensional comprehensive normal-phase liquid chromatography–gas chromatography with time-of-flight mass spectrometric detection	195
10 Characterization of olive oil volatiles by multi-step direct thermal desorption–comprehensive gas chromatography–time-of-flight mass spectrometry using a programmed temperature vaporizing injector	205
11 Characterization of triacylglycerides from edible oils and fats using single and multidimensional techniques	219
<b>Samenvatting</b>	239
<b>List of publications</b>	243
<b>Glossary</b>	247
<b>Dankwoord</b>	251
