# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Linear Panel Data Models . . . . .	3
1.2	Nonlinear Panel Data Models . . . . .	8
1.3	Why new methods are necessary . . . . .	11
1.4	Empirical relevance . . . . .	15
1.5	Thesis overview . . . . .	16
<b>2</b>	<b>Generalized Dynamic Panel Data Models with Random Effects for Cross-Section and Time</b>	<b>21</b>
2.1	Introduction . . . . .	21
2.2	Motivating Examples . . . . .	24
2.2.1	Binary panel: Union Choice . . . . .	25
2.2.2	Binomial panel: Crime rates . . . . .	26
2.2.3	Student's t panel: Stochastic Solow growth model . . . . .	26
2.3	Statistical model formulation . . . . .	27
2.4	Likelihood evaluation by Monte Carlo integration . . . . .	30
2.4.1	Constructing the importance density . . . . .	33
2.4.2	Collapsing the approximate linear Gaussian panel data model . . . . .	36
2.4.3	Constructing the Monte Carlo likelihood . . . . .	39
2.4.4	Unbalanced or incomplete panels . . . . .	40
2.5	Monte Carlo study . . . . .	41
2.5.1	Monte Carlo design . . . . .	42
2.5.2	Diagnostic tests for the importance sampler . . . . .	44
2.5.3	Measuring the efficiency loss of Algorithm A . . . . .	46

2.5.4	Computational savings due to collapsing . . . . .	48
2.5.5	Finite sample properties of Algorithm B . . . . .	48
2.6	Empirical illustrations . . . . .	50
2.6.1	Union Participation of young males . . . . .	52
2.6.2	Crime rates between 1930 and 2005 . . . . .	55
2.6.3	Economic Growth . . . . .	58
2.7	Conclusion . . . . .	63
<b>3</b>	<b>Dynamic Factor Models with Stochastic Loadings</b>	<b>71</b>
3.1	Introduction . . . . .	71
3.2	Dynamic factor model with stochastic loadings . . . . .	75
3.3	Estimation of the loadings, factors and parameters . . . . .	77
3.3.1	Joint posterior mode analysis . . . . .	78
3.3.2	Likelihood evaluation . . . . .	80
3.3.3	Posterior Statistics for the Loadings and Factors . . . . .	81
3.4	Simulation study . . . . .	86
3.4.1	Simulation design . . . . .	87
3.4.2	Comparing empirical Bayes and maximum likelihood . . . . .	88
3.4.3	Importance sampling weights . . . . .	90
3.5	Empirical Illustrations . . . . .	92
3.5.1	Macroeconomic forecasting . . . . .	92
3.5.2	Term structure of interest rates . . . . .	99
3.5.3	Economic growth . . . . .	103
3.6	Conclusion . . . . .	108
<b>4</b>	<b>Joint models of yield curve dynamics and euro area standard and non-standard monetary policy</b>	<b>121</b>
4.1	Introduction . . . . .	121
4.2	Model . . . . .	124
4.2.1	Dynamic Nelson Siegel . . . . .	125
4.2.2	Non-Gaussian explanatory variables . . . . .	127
4.2.3	DNS-SVt . . . . .	129
4.3	Estimation method . . . . .	130

4.3.1	Importance sampling . . . . .	131
4.4	Empirical application for euro area yield curves and monetary policy . . . . .	134
4.4.1	Data . . . . .	134
4.4.2	Monetary policy transmission in pre-crisis and crisis times . . . . .	138
4.4.3	Non-standard monetary policy . . . . .	146
4.5	Conclusion . . . . .	150
<b>5</b>	<b>Monte Carlo Maximum Likelihood Estimation for Generalized Long-Memory Models</b>	<b>159</b>
5.1	Introduction . . . . .	159
5.2	Modeling framework . . . . .	161
5.3	Likelihood evaluation and signal extraction . . . . .	163
5.4	Importance sampling for long-memory processes . . . . .	165
5.4.1	Basic approximation . . . . .	165
5.4.2	Long-memory approximation . . . . .	166
5.4.3	Sampling from the importance density . . . . .	168
5.4.4	Parameter estimation . . . . .	169
5.4.5	Signal Extraction . . . . .	170
5.5	Univariate long-memory stochastic volatility . . . . .	171
5.5.1	Model specification . . . . .	171
5.5.2	Simulation design . . . . .	172
5.5.3	Importance sampling diagnostics . . . . .	172
5.5.4	Simulation results . . . . .	174
5.5.5	Empirical evidence for ten S&P 500 stocks . . . . .	177
5.6	Multivariate long-memory stochastic volatility . . . . .	184
5.7	Conclusions . . . . .	185
<b>6</b>	<b>Forecasting The Boat Race</b>	<b>189</b>
6.1	Introduction . . . . .	189
6.1.1	History . . . . .	191
6.1.2	Data . . . . .	192
6.2	Models and Estimation . . . . .	194
6.2.1	Signal specifications . . . . .	195

6.2.2	Estimation . . . . .	198
6.2.3	In-sample estimation results . . . . .	200
6.3	A forty year forecasting assessment . . . . .	207
6.3.1	Forecasting procedure . . . . .	207
6.3.2	Loss functions . . . . .	208
6.3.3	Equal predictive ability . . . . .	209
6.3.4	Superior predictive ability . . . . .	210
6.3.5	Results . . . . .	212
6.4	Sample Split . . . . .	220
6.4.1	Set up . . . . .	220
6.4.2	Results . . . . .	221
6.5	Conclusion . . . . .	223
<b>7</b>	<b>Conclusion</b>	<b>229</b>
7.1	Contributions . . . . .	229
7.2	Extensions . . . . .	231
	<b>Bibliography</b>	<b>235</b>
	<b>Samenvatting (Summary in Dutch)</b>	<b>255</b>
