Contents

List of Acronyms	v
List of Symbols	vii
List of Figures	x
List of Tables	xi
1 General introduction	1
1.1 Background	2
1.1.1 Importance of land-surface evaporation in the global hydrological cycle	2
1.1.2 How much water is evaporated?	3
1.1.2.1 Estimating transpiration and soil evaporation	4
1.1.2.2 Estimating rainfall interception loss	5
1.1.3 Going global – The power of satellites	5
1.2 Our approach – Rationale and motivation	7
1.2.1 What is GLEAM?	7
1.2.2 Why do we want GLEAM?	8
1.3 Structure of this thesis	8
2 A methodology to estimate global evaporation from satellite observations	9
2.1 Introduction	10
2.2 Methodology	11
2.2.1 Canopy interception loss	12
2.2.2 Soil water content	13
2.2.2.1 Inputs to the soil water budget	13
2.2.2.2 Root-zone water balance	14
2.2.2.3 Satellite surface soil moisture assimilation	14
2.2.3 Evaporative stress	16
2.2.4 Actual evaporation	18
2.3 Satellite observations	19
2.3.1 Net radiation	20

2.3.2	Precipitation	20
2.3.3	Microwave retrievals	21
2.3.4	Static datasets	22
2.4	Validation and discussion	22
2.4.1	Soil moisture profile validation	22
2.4.2	Validation of evaporation estimates	24
2.4.2.1	Selection of ground stations	24
2.4.2.2	Point versus pixel aspects	25
2.4.2.3	Time series validation	25
2.4.2.4	Annual totals and bias	28
2.5	Global application of the methodology	31
2.6	Conclusions	31
3	Estimation of global rainfall interception loss	33
3.1	Introduction	34
3.2	Data and approach	34
3.2.1	Gash's analytical model	35
3.2.2	Satellite-based data	37
3.2.2.1	Precipitation	37
3.2.2.2	Lightning frequency	38
3.2.2.3	Land cover	39
3.3	Field validation results	39
3.4	Magnitude and variability of global interception loss	42
3.5	Concluding remarks	44
4	On the applicability of triple collocation to evaluate evaporation estimates	45
4.1	Introduction	46
4.2	Definition of a TC approach and its application to soil moisture data	47
4.2.1	Methodology	48
4.2.2	Data and processing	49
4.2.3	Results	52
4.3	Application of the TC approach to evaluate global evaporation products	55
4.3.1	Methodology	55
4.3.2	Data and processing	56
4.3.2.1	GLEAM	57
4.3.2.2	MERRA	57
4.3.2.3	PU	57
4.3.3	Results	58
4.3.3.1	Analyses of error estimates of GLEAM	58
4.3.3.2	Inter-product comparison	58
4.3.3.3	Comparison to in situ-measured errors	61
4.4	Conclusions	64

5	Magnitude and variability of land evaporation at the global scale	67
5.1	Introduction	68
5.2	GLEAM	69
5.3	Validation using river discharge	69
5.4	Results	73
5.4.1	Overview of the global hydrological fluxes	73
5.4.2	Spatial distribution of evaporation and its different components	74
5.4.3	Drivers of evaporation	78
5.5	Discussion	80
5.6	Conclusions	82
6	Epilogue	85
6.1	Advantages and limitations	86
6.2	Room for more feasible improvement	87
6.3	Current state of GLEAM	87
6.4	Ongoing activities	88
6.5	Directions for further research	89
	Summary	91
	Samenvatting	95
	Resumen	99
	Bibliography	103
	Publications	123
	Acknowledgements	125
