Contents

<i>Introductie en samenvatting in het Nederlands</i>	9
<i>Introduction</i>	17
Chapter 1 “Compressibility of molten Apollo 17 orange glass and implications for density crossovers in the lunar mantle” <i>Mirjam van Kan Parker, Carl B. Agee, Megan S. Duncan, Wim van Westrenen</i>	25
Chapter 2 “Calibration of a diamond capsule cell assembly for <i>in situ</i> determination of liquid properties in the Paris-Edinburgh press” <i>Mirjam van Kan Parker, Chrystele Sanloup, Elodie J. Tronche, Jean-Philippe Perrillat, Mohamed Mezouar, Nachiketa Rai, Wim van Westrenen</i>	43
Chapter 3 “ <i>In situ</i> density measurements of molten lunar picritic glasses at high pressures and temperatures: technique development and first results” <i>Mirjam van Kan Parker, Chrystele Sanloup, Elodie J. Tronche, Jean-Philippe Perrillat, Mohamed Mezouar, Nachiketa Rai, Wim van Westrenen</i>	55
Chapter 4 “Density of primitive lunar melts” <i>Mirjam van Kan Parker, Nicolas Sator, Bertrand Guillot, Wim van Westrenen</i>	75
Chapter 5 “Experimental and computation study of trace element distribution between orthopyroxene and anhydrous silicate melt: substitution mechanisms and the effect of iron” <i>Mirjam van Kan Parker, Axel Liebscher, Dirk Frei, Jelle van Sijl, Wim van Westrenen, Jon Blundy, Gerhard Franz</i>	89
Chapter 6 “Experimental study of trace element partitioning between lunar orthopyroxene and anhydrous silicate melt: effects of lithium and iron” <i>Mirjam van Kan Parker, Paul R. D. Mason, Wim van Westrenen</i>	111
Chapter 7 “Trace element partitioning between ilmenite, armalcolite and anhydrous silicate melt: implications for the formation of lunar high-Ti mare basalts” <i>Mirjam van Kan Parker, Paul R. D. Mason, Wim van Westrenen</i>	137

Chapter 8 “Trace element evolution during crystallisation and remelting of the lunar magma ocean” <i>Mirjam van Kan Parker, Wim van Westrenen</i>	159
References	175
Appendix “Pressure calibration of a piston cylinder assembly”	191
Acknowledgements	196
Curriculum Vitae	199
