TABLE OF CONTENTS

Introduction		7
Part 1: Pathogens in the vaginal tract and their interaction with the immune system		
Chapter 1	Effect of cytokine level variations in individuals on the progression and outcome of bacterial urogenital infections – a meta-analysis	27
Chapter 2	CpG DNA analysis of bacterial STDs	49
Chapter 3	Host polymorphisms in TLR9 and IL10 are associated with the outcomes of experimental <i>Haemophilus ducreyi</i> infection in human volunteers	67
Part 2: The interaction between the vaginal microbiota and host reproductive health		
Chapter 4	The two-sided role of the vaginal microbiome in Chlamydia trachomatis and <i>Mycoplasma genitalium</i> pathogenesis	87
Chapter 5	The relation of the vaginal microbiota to early pregnancy development during In Vitro Fertilization treatment – A meta-analysis	107
Chapter 6	The ReceptIVFity cohort study protocol to validate the urogenital microbiome as predictor for IVF or IVF/ICSI outcome	125
Chapter 7	The vaginal microbiome as a predictor for outcome of in-vitro fertilization with or without intracytoplasmic sperm injection: a prospective study	143
Chapter 8	The profiling of microbiota in vaginal and urine samples using 16s rRNA gene sequencing and IS-pro analysis	171
Discussion		193
