Contents

1. General introduction 7

Part I: Transdermal hormone therapy

2. Oral, more than transdermal, estrogen therapy improves lipids and lipoprotein(a) in postmenopausal women: a randomized, placebo-controlled study
   Menopause 2003;10:550-558 15

3. Effects of transdermal and oral postmenopausal hormone therapy on vascular function: a randomized, placebo-controlled study in healthy postmenopausal women
   Menopause 2005;12:526-535 29

4. Oral, more than transdermal, oestrogen therapy lowers asymmetric dimethylarginine in healthy postmenopausal women: a randomized, placebo-controlled study
   Journal of Internal Medicine 2006;259:199-208 47

Part II: Intranasal hormone therapy

5. Intranasal continuous combined 17beta-estradiol/norethisterone therapy improves the lipid profile in healthy postmenopausal women
   Fertility and Sterility 2006;85:979-988 63

6. No increase in C-reactive protein levels during intranasal compared to oral hormone therapy in healthy post-menopausal women
   Human Reproduction 2006;21:1635-1642 79

7. Less effect of intranasal than oral hormone therapy on factors associated with venous thrombosis risk in healthy postmenopausal women
   Arteriosclerosis Thrombosis and Vascular Biology 2006;26:1660-1666 93

8. Hemostatic markers in healthy postmenopausal women during intranasal and oral hormone therapy: a randomized trial
   Menopause, in press 107

9. Effects of intranasal versus oral hormone therapy on asymmetric dimethylarginine in healthy postmenopausal women: a randomized study
   Atherosclerosis, in press 123
Part III: Review, discussion and conclusions

10. Effects of non-oral postmenopausal hormone therapy on markers of cardiovascular risk: a systematic review
   *Fertility and Sterility, in press* 139

11. General discussion and conclusions 185

Appendix:

- Summary 193
- Samenvatting 199
- Authors' affiliations 201
- Dankwoord 203
- List of publications 205
- Curriculum vitae 207
