Modern Burn Treatment and Outcome Assessment

Promotor: Prof. E. Middelkoop.

Copromotores: dr. M.E. van Baar en dr. C.H. van der Vlies

Contents

**Chapter 1:** General introduction and outline of this thesis 9

**Part I: Surgical Management**

**Chapter 2:** A systematic review on surgical and non-surgical debridement techniques of burn wounds (in revision at Journal of Plastic, Reconstructive & Aesthetic Surgery) 23

**Chapter 3:** Long term scar quality after hydrosurgical versus conventional debridement of deep dermal burns: a multicentre randomized controlled trial - study protocol (Trials, 2018) 47

**Chapter 4:** Long term Scar Quality in Burn Wounds with distinct healing potentials (Wound Repair and Regeneration, 2016) 61

**Chapter 5:** Burns in the elderly, a nation-wide study on surgical management and clinical outcome (submitted to JAGS) 85

**Part II: Modern Burn Outcome Assessment**

**Chapter 6:** Predictive validity of short term scar quality on final burn scar outcome using the Patient and Observer Scar Assessment Scale in patients with minor to moderate burn severity (Burns, 2016) 107

**Chapter 7:** Return to work after specialised burn care in the Netherlands: a two year follow up study of prevalence, predictors and related costs (Injury, 2016) 129

**Chapter 8:** Follow-up in patients with a burn related emergency department visit: a feasibility study (Burns and Trauma, 2017) 151

**Chapter 9:** Discussion & recommendations for future research 169

**Chapter 10:** Addendum Dutch summary (samenvatting in het Nederlands) 189
