Summary		1
Samenvatting		5
Chapter 1	- General introduction	11
Chapter 2	- Lithologically inherited variation in Pb isotope ratios in sedimentary soils in The Netherlands	23
Chapter 3	- Tracing diffuse anthropogenic Pb sources in rural soils by means of Pb isotope analysis	49
Chapter 4	- Reconstruction of historical atmospheric Pb using Dutch urban lake sediments: a Pb isotope study	91
Chapter 5	- The lead (Pb) isotope signature, behaviour and fate of traffic-related lead pollution in roadside soils in The Netherlands	117
Chapter 6	- Lead pollution in soils of villages and cities with a long habitation history: a Pb isotope study	151
Chapter 7	- Factors controlling the oral bioaccessibility of anthropogenic Pb in polluted soils	179
Chapter 8	- General discussion	211
