Effects of abiotic factors on plant-insect multitrophic interactions

PhD thesis Vrije Universiteit Amsterdam

NIOO thesis 171

Thesis 2019 of the Department of Ecological Science, Vrije Universiteit Amsterdam
The Netherlands

The research presented in this thesis was carried out in the Department of Terrestrial Ecology of the Netherlands Institute of Ecology (NIOO-KNAW).

This study was supported by a grant of China Scholarship Council (No. 201406660008) and the Department of Terrestrial Ecology at NIOO-KNAW.

VRIJE UNIVERSITEIT

Effects of abiotic factors on plant-insect multitrophic interactions

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad Doctor of Philosophy
aan de Vrije Universiteit Amsterdam,
op gezag van de rector magnificus
prof.dr. V. Subramaniam,
in het openbaar te verdedigen
ten overstaan van de promotiecommissie
van de Faculteit der Bètawetenschappen
op donderdag 03-10-2019 om 11.45 uur
in de aula van de universiteit,
De Boelelaan 1105

door

Cong Chen

geboren te Hunan, China

promotoren: prof.dr. J.A. Harvey
 prof.dr. J. Ellers

copromotoren: dr. R. Gols
 dr. A. Biere

“Be shapeless. Be formless. Like water. When you pour water in a glass, it becomes the glass. When you pour water into a cup, it becomes the cup. When you pour water into a tea pot, it becomes the tea pot. Water can flow, or water can crash. Be water my friend.”

Bruce Lee

Table of Contents

Chapter 1	General introduction	9
Chapter 2	Responses of insect herbivores and their food plants to wind exposure and the importance of predation risk	23
Chapter 3	Direct and plant-mediated effects of simulated rain downpours on insect herbivore performance	59
Chapter 4	Differential effects of climate warming on reproduction and functional responses on insects in the fourth trophic level	87
Chapter 5	Simulated heatwave conditions associated with global warming affect development and competition between hyperparasitoids	113
Chapter 6	General discussion	143
References		159
Summary		175
Samenvatting		179
