Table of contents

Chapter 1  Introduction and Thesis outline  8 - 11

Part 1. Coronary hemodynamics and clinical applications after acute myocardial infarction

Chapter 2  Intramyocardial hemorrhage after acute myocardial infarction.  12 - 39

Chapter 3  Dissecting the effects of ischemia and reperfusion on the coronary microcirculation in a rat model of acute myocardial infarction.  40 - 61
PLoS One. 2016 Jul 8;11(7):e0157233

Chapter 4  Doppler-derived intracoronary physiology indices predict the occurrence of microvascular injury and microvascular perfusion deficits after angiographically successful primary percutaneous coronary intervention.  62 - 89

Chapter 5  Hyperemic Microvascular resistance is a predictor of clinical outcome after revascularization for acute myocardial infarction: A patient-level pooled analysis.  90 - 108
Heart. 2018 Jan;104(2):127-134

Chapter 6  Changes in coronary blood flow after acute myocardial infarction: Insights from a patient study and an experimental porcine model.  109 - 129

Part 2. Coronary hemodynamics and clinical applications in stable ischemic heart disease

Chapter 7  Coronary autoregulation and assessment of stenosis severity without pharmacological vasodilation.  130 - 152

Chapter 8  Coronary pressure and flow relationships in humans: phasic analysis of normal and pathological vessels and the implications for stenosis assessment: a report from the Iberian-Dutch-English (IDEAL) collaborators.  153 - 183
Part 3. Comparing methods to measure coronary hemodynamics

Chapter 12 The downstream influence of coronary stenosis on microcirculatory remodeling: A histopathology study. Submitted

Chapter 13 Diastolic-systolic velocity ratio to detect coronary stenoses under physiological resting conditions: A mechanistic study. *Open Heart*. 2019 Mar 1;6(1)

Chapter 16 Continuous thermodilution to assess absolute flow and microvascular resistance: Validation in humans using [15O]H2O PET. *European Heart Journal* 2019

Chapter 17 General summary and future perspectives 344 - 351

Appendices 352 - 368
