Blood cell-derived human tissue Transglutaminase (TG2) in multiple sclerosis

- Implications for the pathogenesis and clinical outcome -

Claudia Sestito

Title: **Blood cell-derived human tissue Transglutaminase (TG2) in multiple sclerosis** - *Implications for the pathogenesis and clinical outcome* -
Author: Claudia Sestito
Cover front: Design Credits: vecteezy.com
Cover back: Image from shutterstock - resembling TG2 molecular structure in an open conformation
Lay Out: Jasper Koning
Printed by: Ipskamp Printing
ISBN: 978-94-028-1643-3

The author and the research presented in this thesis were financially supported by the European Union's Seventh Framework Program FP7 "TRANSPATH" (grant nr 289964) and the Dutch Multiple Sclerosis (MS) Research foundation (grant nr MS14-865).

Financial support for the printing of this thesis was kindly provided by the Dutch Multiple Sclerosis (MS) Research foundation.

VRIJE UNIVERSITEIT

Blood cell-derived human tissue Transglutaminase (TG2) in multiple sclerosis

- Implications for the pathogenesis and clinical outcome -

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad Doctor aan
de Vrije Universiteit Amsterdam,
op gezag van de rector magnificus
prof.dr. V. Subramaniam,
in het openbaar te verdedigen
ten overstaan van de promotiecommissie
van de Faculteit der Geneeskunde
op donderdag 31 oktober 2019 om 9.45 uur
in de aula van de universiteit,
De Boelelaan 1105

door

Claudia Sestito

geboren te Rome, Italië

promotor:	dr. B. Drukarch
copromotoren:	dr. A.M.W. van Dam dr. M.M.M. Wilhelmus
