# TABLE OF CONTENTS

## LIST OF ABBREVIATIONS

**CHAPTER 1**

**Introduction**

1.1 *The issue*  
1.2 *Purpose and objective*  
1.3 *Scope and research questions*  
  1.3.1 Analyzing and recasting the autonomous weapons debate  
  1.3.2 Targeting as a process rather than an isolated action  
  1.3.3 Targeting law as a set of rules or organizational law through the lens of military practice  
  1.3.4 The organizational perspective informing ‘meaningful human control’  
1.4 *Outline of the thesis*

**CHAPTER 2**

*The research process: entering practice and procedure*

2.1 *Introduction*  
2.2 *The targeting process*  
  2.2.1 Why the NATO and U.S. targeting processes?  
  2.2.2 The law of targeting in the military context  
  2.2.3 Representation  
2.3 *Participant observation at the UN CCW*  
2.4 *Empirical research into targeting practices*  
  2.4.1 Classified materials  
  2.4.2 How I gained access to the Pentagon and became a ‘certified targeteer’  
  2.4.3 Talking with practitioners  
  2.4.4 Data collection limitations  
  2.4.5 Case studies of specific targeting scenarios  
2.5 *Caveats*  
  2.5.1 Positioning  
  2.5.2 Exercise artificialities  
  2.5.3 Air Force lens  
  2.5.4 Issues beyond the scope  
  2.5.5 Technological development
CHAPTER 3
Why it is so hard to talk about ‘Autonomous Weapons’

3.1 Introduction
3.2 Definitional disputes at the international political level
3.3 Finding ‘common ground’
  3.3.1 Emerging commonalities: Introducing two consensus claims
  3.3.2 The path to a common vernacular to describe autonomous weapons
3.4 Differences without distinction and distinction without difference
  3.4.1 Autonomy
  3.4.2 Target selection and attack
  3.4.3 Human intervention
3.5 Conclusion

CHAPTER 4
The (il)legality of Autonomous Weapons under the law concerning targeting in armed conflict

4.1 Introduction
4.2 Autonomous weapons’ (un)lawfulness per se
4.3 (Un)Lawful use of autonomous weapons under targeting law
  4.3.1 The principle of distinction
  4.3.2 The principle of proportionality
  4.3.3 The requirement to take precautionary measures
4.4 Pointing the finger: Who has legal responsibility?
  4.4.1 Legal responsibility frameworks
  4.4.2 Autonomous weapons and legal responsibility
  4.4.3 The decisive element of context: Targeting as a process, not an isolated action
  4.4.4 The decisive element of context: Shared responsibility within the organization
4.5 Conclusion

CHAPTER 5
The human element

5.1 Introduction
5.2 The human element in theory
  5.2.1 Labels
  5.2.2 Content
  5.2.3 Human control over what and by whom?
5.3 Laying the groundwork: Different targeting types and missions
5.3.1 Deliberate and dynamic targeting 135
5.3.2 Air Interdiction 138
5.3.3 Close Air Support 139
5.3.4 Strike Coordination and Reconnaissance 139
5.3.5 Time Sensitive Target prosecution 140
5.4 Case 1: Human control in an Air Interdiction operation 142
5.4.1 Details of the platform, weapon and target 143
5.4.2 The mission execution 143
5.4.3 Assessing human control in operation 149
5.5 Case 2: Human control in a Close Air Support operation 150
5.5.1 Details of the platform, weapon and target 151
5.5.2 The mission execution 152
5.5.3 Assessing human control in operation 160
5.6 Control from a military perspective 161
5.6.1 ‘Control’ in military doctrines 162
5.6.2 Distributed control in the context of the military organization 166
5.7 Conclusion 168

CHAPTER 6 171
The targeting process: An analysis of the distributed nature of human control and the implementation of targeting law in respect of military conduct and decision-making 171
6.1 Introduction 172
6.2 The role of law(yers) in the targeting process 175
6.2.1 The role of the legal advisers in AP I 175
6.2.2 Law(yers) in practice: The context of ‘military effectiveness’ 178
6.2.3 Law(yers) in practice: Legal framing in a mission-oriented framework 184
6.2.4 Law(yers) in practice: Constraint and enabler 186
6.3 Compliance through control? The distributed nature of control and the implementation of the law in the context of the targeting process 188
6.3.1 Phase 0: Higher-level guidance 189
6.3.2 Phase 1: JFC objectives, guidance and intent 192
6.3.3 Phase 2: Target development, validation, nomination and prioritization 194
6.3.4 Phase 3: Capabilities analysis 204
6.3.5 Phase 4: Commander’s decision, force planning and assignment 210
6.3.6 Phase 5: Mission planning and execution 216
6.3.7 Phase 6: Combat assessment 222
6.4 Conclusion 224
CHAPTER 7  227
Conclusions  227
7.1  The ‘invisible’ influence of military AI  228
  7.1.1  Artificial Intelligence for Intelligence  230
  7.1.2  Automating target planning  232
  7.1.3  Autonomous force application  234
7.2  The transformative potential of AI  236
7.3  Final remarks  240

BIBLIOGRAPHY  243

Appendix I  265
Appendix II  271
Appendix III  272
Appendix IV  273

SUMMARY  277

SAMENVATTING  283

ABOUT THE AUTHOR  289
