Contents of the Dissertation

General introduction

Chapter 1 Contactins in the Central Nervous System: Role in Health and Disease

Chapter 2 Detection of contactin-2 in cerebrospinal fluid (CSF) of patients with Alzheimer's disease using Fluorescence Correlation Spectroscopy (FCS)

Chapter 3 Contactin-2, a synaptic and axonal protein, is reduced in cerebrospinal fluid and brain tissue in Alzheimer's disease

Chapter 4 Contactin-2 in cerebrospinal fluid is associated with the products of Amyloid Precursor Protein (APP) processing in APOE ε4 positive Alzheimer’s disease patients
(Manuscript in preparation.)

Chapter 5 Contactin-1 and contactin-2 are reduced in cerebrospinal fluid of Parkinson’s disease patients and are present within Lewy bodies
(Manuscript in preparation.)

Chapter 6a Contactin-1 and contactin-2 in cerebrospinal fluid as potential biomarkers for axonal domain dysfunction in multiple sclerosis

Chapter 6b Contactin-1 levels in serum of MS patients: A pilot study

Chapter 7 Summary and general discussion
