Contents

Chapter 1: Introduction	
○ 1.1: Protein aggregation in the pathology of Parkinson's disease and related disorders: aSyn as 'pathological Parkinson protein'	p. 13
○ 1.2: Converging evidence for dysfunctional protein degradation in Parkinson's disease	p. 27
Chapter 2: Therapeutic potential of autophagy-enhancing agents in Parkinson's disease	p. 47
Chapter 3: Multi-platform quantitation of alpha-synuclein brain variants reveals disease-specific biochemical profiles of synucleinopathies	p. 77
Chapter 4: Characterization of brain lysosomal activities in GBA-related and sporadic Parkinson's disease and dementia with Lewy bodies	p. 115
Chapter 5: Path mediation analysis reveals GBA impacts Lewy body disease status by increasing α -synuclein levels	p. 143
Chapter 6: A multitude of morphologies containing alpha-synuclein variants in brain tissue with different synucleinopathies	p. 173
Chapter 7: Subcellular orchestration of a-synuclein variants in Parkinson's disease brains revealed by 3D multicolor STED microscopy	p. 201
Chapter 8: TFEB accumulates at the Golgi network in neurons with alpha-synuclein cytopathology in GBA-related and sporadic Parkinson's disease and dementia with Lewy bodies	p. 255
Chapter 9: Summary and general discussion	p. 281
Nederlandse samenvatting	p. 313
Dankwoord/Acknowledgements	p. 321
List of publications	p. 327
Biography	p. 328
